For Batch 2024-26

MASTER OF OPERATIONAL RESEARCH

Department of Operational Research

Faculty of Mathematical Sciences, University of Delhi

https://or.du.ac.in/Home
011 - 2766 6672
placementcell@or.du.ac.in

About The Department

- Operational Research was introduced at the University in 1963 as a two-year postgraduate program, and in the following decade, the Department of Operational Research was formally established under the Faculty of Mathematical Sciences. It was the first institution in India to offer a Master's degree in this field, and the department has now completed over 50 years of academic excellence.

- The Department's North Campus features modern, air-conditioned classrooms with audiovisual aids, a computer lab, and access to departmental and central libraries. In 1994, the department expanded to the South Campus with an M.A./M.Sc. course in Applied Operational Research, offering a peaceful, green environment conducive to learning. In 2019, both campuses' programs were unified into a single "Master of Operational Research Program".

Message From Head Of The Department

Prof. K K Aggarwal

It gives me great pleasure to welcome you to the Department of Operational Research at the University of Delhi. Since its inception in 1963, it has stood as a flagship academic offering of the University. The University of Delhi is proud to be one of the pioneering institutions in India a full-fledged two-year master's programme exclusively in Operational Research.

In today's data-rich and technology-driven world, Operational Research plays an increasingly vital role across diverse sectors such as finance, marketing, logistics, defense, telecom, energy systems, and public policy. The MOR programme places special emphasis on analytical modelling, statistical inference, machine learning techniques, and the use of powerful data analysis tools to extract actionable insights. In their final semester, students undertake industry-linked projects, the techniques and skills acquired throughout the programme to real-world challenges.

Our alumni have consistently distinguished themselves in leading Indian and global organizations, excelling as analysts, consultants, data scientists, researchers. We are confident that this year's graduating batch will uphold this tradition of excellence and meet the highest professional standards of the industry.

I take this opportunity to invite your esteemed organization to engage with our Department and participate in our Placement Programme. We look forward to building a meaningful and mutually beneficial association with you.

I also extend my best wishes to all our students as they embark on their professional journeys.

Batch Statistics 2024 - 2026

Gender Ratio

65% 35%

Batch Size
